PERSONAL PROJECTS

Full-Stack Todo Application (04/2024 - 04/2024)

- Developed a full-stack Todo application using Next.js and Node.js with Express. Users can create, update, and delete tasks, with features like user authentication, due dates, and task categorization. The responsive design ensures usability across devices, enhancing productivity and task management.

Real-Time Chat Application (05/2024 - 08/2024)

- Built a real-time chat application utilizing Socket.io for seamless communication between users. This project features user authentication, one-on-one messaging, and group chat functionalities. The application provides an intuitive interface for users to connect and communicate in real-time, enhancing engagement and collaboration in various contexts.
